ABOUT ME

Front-End Developer (React.js) with 1.8 years of experience building scalable, enterprise-grade web applications. Skilled in collaborating within Agile teams, translating business requirements into high-performance UI solutions, and delivering clean, maintainable code using React.js, JavaScript (ES6+), HTML, and CSS.

WORK EXPERIENCE

FRONT-END DEVELOPER

Intugratic Solution Pvt. Ltd. – Bhopal

July 2024 – Present

- Developed enterprise-level CRM web applications managing the complete customer lifecycle.
- Built responsive user interfaces using React.js, JavaScript (ES6+), HTML5, CSS3, and Tailwind CSS.
- Created reusable React components to improve UI consistency and scalability.
- Managed application state using React Hooks and Redux (basic).
- Integrated REST APIs and implemented form validation, error handling, and loading states.
- Collaborated with cross-functional teams in an Agile/Scrum environment using Git.

THE KIDDLES – KIDS E-COMMERCE WEBSITE

Mar 2024 – May 2024

Freelance Project | Frontend Developer

🔗 [thekiddles](#)

Tech: React.js, Tailwind CSS, React Router, REST API Integration

- Developed responsive frontend UI for a live kids e-commerce platform using React.js and Tailwind CSS.
- Implemented product listing, category navigation, and routing with React Router.
- Integrated REST APIs to display dynamic product data from backend services.
- Built reusable components to ensure UI consistency and scalability.
- Optimized the application for mobile responsiveness, performance, and cross-browser compatibility.
